

Login with 2FA on iFISe

What is login with 2FA (2 Factor Authentication)

2 Factor Authentication (2FA) is an extra layer of security used to make sure that people trying to gain access to an iFISe account are who they say they are. First, a user will enter their ‘Something You Know’ such as username and password. Then, instead of immediately gaining access, they will be required to provide another piece of information with ‘Something You Have’ such as SMS OTP or registered device.

You must have mobile phone which is installed [PROFIS Application](#) for generate OTP for access the system.

Prepare for login with 2FA on iFISe
